

# Discussion Questions

- Cognition
  - How can we recognize and ameliorate data-dependent cognitive constraints in geovisual representations?
- Spatial Decision Support
  - What GVA techniques support three phases (intelligence, design, choice) of structured decision processes?
- Geocollaboration
  - Which GVA operations should be exposed for sharing between collaborators, and which are best for a single analyst?
- Usability
  - Can a meta-language driven approach be effective in facilitating GVA workflows?
- Data Transformation/Cognition
  - How can we articulate a trade-off between the power of data representation and the perceptual effect of map distortion?
